EXPERIENCE

July 2025 - Current

Web Developer Intern

BandiWala | Hyderabad

- Collaborated with a team of 3 developers to build BandiWala's web platform at bandiwala.co.in, a service marketplace application, developing responsive user interfaces with React and implementing backend APIs and business logic with Express.js for efficient data management and application functionality.
- Developed three Flutter mobile applications for BandiWala (User, Vendor, and Admin), integrating a unified Firebase backend with SMS authentication to enhance secure user verification.
- User app (successfully published on Google Play Store), a Vendor app for service providers, and an Admin app for platform management. All three apps share a unified Firebase backend with SMS-based authentication for secure user verification.

EDUCATION AND TRAINING

Bachelor of Technology | Information Technology

VNRVJIET, Hyderabad

- Capstone Projects:
- Developed a Flutter-based college matchmaking app with server-driven UI (STAC framework) for dynamic JSON-to-widget rendering.
- Implemented vector-based 5D personality matching system using spherical binning for real-time user compatibility.
- Built Python FastAPI backend with MongoDB, RESTful APIs, and Socket.IO for real-time communication and event coordination.
- Integrated Firebase Authentication for secure user management and multi-phase venue voting system for events.
- Established automated CI/CD pipeline via GitHub Actions to build and deploy APK releases to Vercel Blob Storage.
- Applied Clean Architecture and Riverpod state management for scalable, maintainable, and performant app design.
